CONTENTS

Introduction **4**

I. Two-valued classical propositional logic $\mathbf{C_2}$ 8

1. Logical connectives. Truth-tables 8
2. The laws of classical propositional logic 10
3. Functional completeness 12
3.1. Sheffer stroke 13
4. Axiomatization. Adequacy …… …. 17

II. Łukasiewicz's three-valued logic $\mathbf{Ł_3}$ 17

1. Logical fatalism……. 17
2. Truth-tables. Axiomatization …… 19
3. Differences between $\mathbf{Ł_3}$ and $\mathbf{C_2}$ ……. 21
4. An embedding $\mathbf{C_2}$ into $\mathbf{Ł_3}$ and three-valued isomorphs of $\mathbf{C_2}$… 23

III. Łukasiewicz's finite-valued logics 27

1. Łukasiwicz's *n*-valued matrix ……. 27
2. Matrix logic $\mathbf{Ł_n}$ …… 27
3. Axiomatization of $\mathbf{Ł_n}$ …… 28
4. Cardinal degrees of completeness of $\mathbf{Ł_n}$ ……... 30
5. Interpretations of $\mathbf{Ł_n}$ ……... 31
5.1. T-F-sequences as truth-values …… 33
5.2. Factor-semantics for $\mathbf{Ł_n}$ ……... 35

IV. Functional properties of Łukasiewucz *n*-valued logic $\mathbf{Ł_n}$ 38

1. Preliminary remarks ……. 38
2. J_i-functions ……... 38
3. McNaughton's criterion for definability of functions in $\mathbf{Ł_n}$ …. 39
4. Sheffer stroke for $\mathbf{Ł_n}$ …… 39
5. Functional extensions of $\mathbf{Ł_n}$ ……... 40
6. Post logics $\mathbf{P_n}$ ……..... 41
7. Logic as a functional system:
Closure operation, completeness and precompleteness ……. 43
8. $\mathbf{Ł_3}$ between $\mathbf{C_2}$ and $\mathbf{P_3}$: the continuality of $\mathbf{Ł_3}$ …… 44
9. Maximal *n*+1-valued non-Postian logic ……. 45
10. Precompleteness and prime numbers ……..…….. 47

V. Structuralization of prime numbers **49**

1. Partition of the set of Łukasiewicz's logics $\mathbf{Ł_{n+1}}$ relative to the precompleteness property …….. 49
2. Construction of the classes χ_{p_s+1} (inverse Euler's totient function) …….. 52
3. Graphs for prime numbers ……. 57

3.1. A Hypothesis about finiteness of rooted trees …… 70

4. *p*-Abelian groups …… 71

4.1. Carmichael's totient finction conjecture ……. 73

5. Canceled rooted trees ……. 75

VI. A matrix logic for prime numbers and the law of generation of classes of prime numbers **84**

1. Characterization of prime numbers by matrix logic $\mathbf{K_{n+1}}$ ……..... 84
2. Functional properties of logic $\mathbf{K_{n+1}}$ …… … 86
3. Matrix logic $\mathbf{K'_{n+1}}$…… 92
4. Sheffer stroke for prime numbers ……... 95
5. The law of generation of classes of prime numbers …… 98

VII. Characterization of classes of natural numbers by logical matrices **103**

1. Prime numbers …… 103
2. Powers of primes ……..…… 104
3. Even numbers …….. 107
4. Odd numbers …… 108
5. Some remarks on Goldbach's conjecture …… 110

Numerical tables **112**

Table 1. Degrees of cardinal completeness $\gamma(\mathbf{Ł_n})$ …….. 113

Table 2. Cardinality of rooted trees T_p and cardinality of canceled rooted trees ……. 123

Table 3. Values of function $i(p)$: classes of prime numbers …… 133

Concluding remarks **141**
